

Transcription Test Observations.

- The supplier title does not accept the number of characters set in the database.
- Double-clicking alone does not save the business title entry.
- The first product name on purchase only takes 11 characters instead of the length set in the database.
- There are no fields to input the ETR details in our system.
- Clicking on an entry in the receipt table does not affect the image (coordination issue).
- Deactivating the page works only the first time but fails for the second record.
- The sorting on the purchase table gets disarranged.
- Some save buttons on the receipt table are not checked even after saving (e.g., Record 361).
- Entering two product names with the same name causes one to be replaced.
- The supplier title does not accept the number of characters set in the database.

- Entering two product names with the same name causes one to be replaced.
- Receipt.ref is an int but it seems like it has a limit.(e.g., Record 364).
- Some images need to be zoomed for the user to clearly see text.(e.g., Record 364).
- The number of characters for supplier e-mail is also limited.(e.g., Record 364).
